Message from the President

This month Telemet celebrated its 40th anniversary. Much has changed since our start-up in 1979. Mainframe computers and time share services ruled that day. Data were hard to come by and real-time data even harder. Since then we have seen the birth of entire information industries and hardware to support them.

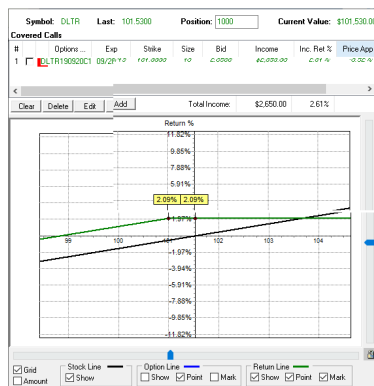

We are proud to be part of this revolution and participate in pushing the limits of information technology for your benefit.

We promise we will continue to do this in the future to ensure that our platform enhances your workflow and captures great information.

Fred Parsons, CEO

Enhancement News

Options Montage

Selling calls against current positions can give downside protection and we have analytics and charts to show protection points, and analytics to show returns.

We have updated the options montage page too! Filters classify options with traditional monthly or with weeklies expirations. Other filters show options around the nearest trade price. Options are presented in an easy to read format with month expirations called out. Naturally Greeks and protection points are presented.

Options time and sale keep the trader up to date on detail price movements.

Note also that open interest put call ratios, indicators of bullish or bearish sentiment, can be displayed on price and holdings pages.

Call or email us for more information or a test trial of our options service.

Fed Funds, Overnights, Commercial Paper and Eurodollar Data

Recently there has been much comment in the news about repo rates recent volatility.

Telemet has what many may recall as "Telerate Page 5" a much watched page with Fed Funds, Repo rates, commercial and Eurodollar data. This along with our "off the run" treasury data keeps you abreast of fixed income yields and movements.

And don't forget that the latest versions of Telemet have a yield curve presentation also much in the news recently! Along with the yield curves, there are charts of historic yield and spreads.

For help accessing these, please contact client services.

Microsoft XP Support has Sunset & Windows 7 Planned Sunset

Hacking and network penetrations are becoming more and more prevalent. It is important that you keep your firewalls and security software current and enabled. Microsoft Windows XP support ended some time ago and does not support the latest security modules which Telemet employs in its ticker plant and administrative networks. To keep up with the latest security defenses Telemet will not support connectivity to Microsoft Windows XP computers.

As a further note on this Microsoft will sunset Windows 7 support January 14, 2020. We recommend you plan upgrades of Windows 7 PCs prior to that time.

Pricing & Dividend Service Changes

Many of you use Telemet's TeleVista for pricing and dividend updates in portfolio management and trade order management systems. Telemet is making changes to add additional robustness to these services. You will be contacted by our client service team to guide you through any changes needed at your end.

Webinar

All about Our Next Webinar

Our last Webinar was "A General Orientation". The Webinar reviewed features of Telemet you may have forgotten about and how to get the most out of the platform. . The Webinar was recorded so you can review this material even if you missed the Webinar. Here is the link to past Webinars [Webinar](#).

Our next Webinar will be on "Portfolio Attribution" important for client and management meetings. Answer questions such as - Where did the performance of your portfolio come from? Are you underweight or overweight Sectors? Was the portfolio performance correlated to a Quintile measure, such as high or low Price to Earnings? These are just some of the questions that can be answered by using Telemet Orion Multi-Style Attribution function

The Webinar will be held Thursday October 3rd at 2PM ET. An announcement will be made shortly. Please sign up!

To get help to find or review past webinars which contain valuable orientation materials on charts, spreadsheets and attribution, call/email or chat with a member of your client service team, 800-368-2078 or support@taquote.com.
